COMPANY PROFILE

INTRODUCTION

Our business was established in 2003 as part of a business group of AR Master in Security CC, with the prime objective to Build, Renovation, Maintenance Contracts and marketing of selected security products on national and international level the management of such projects/installation.

AR Master in Security at that stage had the sole marketing agency from Integrated System Technologies for all Combat Training products including the security thereof in more than 10 foreign countries and obviously perfect opportunity to market RSA related products.

Co-operation with the local industry and more specifically with the CSIR/Kiwango Security Joint Venture during 2004 for the hi-tech perimeter detection system was a key factor\ in participating in the security industry and to advance to new levels.

AR Master in security later came to the conclusion that the local market needed 100% more attention and decided to register Build Afrika Holding, the company that the registration number is, 2016/024075/07 in January 2016. An experienced Managing Director Mr Andries Komape (the founder member of the company AR Master in Security) drafted the operational strategy for the PTY LTD with the sole purpose to deal with the local market, industry and possible Africa Frontline States, should there be enquiries and/or opportunities.

During December 2015, Mr A.R Komape decided to part the company and resigned From AR Master in security. He decided to register the company Build Afrika Holding Pty, Ltd in January 2016 as a highly motivated individual who continued to be inspired by the opportunities that exist in South Africa and beyond its borders.

The company conducts business under the following divisions:

- Build Afrika Electronics and Security
- Build Afrika Electrical and Electronics
- Build Afrika Construction& maintenance
- In joint venture with Idwala elithembekile cc
- Build Afrika Streets Parol and Crime preventions

OBJECTIVES

The main objectives are:
